

Custom Cycling Kits Explained in 4 Easy Steps

1. Start with a Design

There are two ways to get a custom design made:

Create Your Own Design

If you'd like to design your own apparel, you can [download the design templates](#) and get started. We have no design set-up fees, unlimited colors and printing and placement, and free design support.

Use the Design Concept Library

We took the heavy lifting out of the design process for you. [Choose which concept](#) you like, and just fill out the form with your colors, logos, and information.

We'll take care of getting the design started for free.

2. Maximize on Minimums

All minimums are mix and match, meaning you can meet the requirement through any combination of tops, bottoms, or suits, no matter the cut, style, collection, or sport. When we say any combination, we mean any combination.

3. Picking the Products

We offer fully custom cycling, triathlon, running, casual apparel, and customizable accessories. The art department will apply your design to any of the products - for free! - you'd like available in your store. For free!

Cycling Apparel

A wide range of apparel from classic club jerseys to highly aerodynamic skinsuits and everything in between.

4. Let 'em Order

All team members can order the items they want, in your design, with our mix and match minimums. There doesn't have to be a consensus on one cut, sport, collection, or style, because, let's be honest, one style never fits all.

5. Reorder, (crash) replacements, and reviews.

Reorder the same design anytime, with half the minimum order requirement. All Champion System apparel is backed with a Lifetime Quality Guarantee, Crash Replacement Program, and Fitness Flexibility Program.
